DATE OF BIRTH

20 November 1997

SKILLS

JavaScript / ES6+

React.js

Node.js / Express

PHP / Laravel

MongoDB

MySQL / SQL

HTML5 / CSS3

Python

Git / GitHub

LANGUAGES

Azerbaijani — Native

Turkish — C1

English — B1

PROFESSIONAL PROFILE

Fullstack Developer specialized in the end-to-end development of modern web applications. I have excellent knowledge and experience in the MERN Stack (MongoDB, Express.js, React.js, Node.js), as well as PHP/Laravel and MySQL technologies. I also work efficiently with Python and SQL. Thanks to my engineering background, I approach problems in a systematic and analytical way — which enables me to find optimal solutions in complex projects.

I have been involved in programming from an early age and continuously invest in my professional growth. I place a strong emphasis on writing clean, well-structured code and strictly adhering to international standards and modern development methodologies. I learn new technologies in a short time and aim to add value to every project from both a technical and strategic perspective.

TECHNICAL COMPETENCIES

► Frontend Development

Development of dynamic and responsive user interfaces based on React.js, building semantic and accessible web solutions with modern JavaScript (ES6+) standards, HTML5 and CSS3.

► Backend Development

Designing RESTful API architectures on Node.js and Express.js platforms, building scalable server-side solutions with the PHP and Laravel framework, and implementing automation and backend solutions in Python.

► Databases

Managing document-based data in MongoDB (NoSQL), designing and performance-optimizing MySQL and other SQL-based relational databases.

► Version Control

Structured team-based code management on Git and GitHub, organizing the code review process and applying modern workflow methodologies.

EDUCATION

Sumgait State University

Bachelor — Power Machinery Engineering

August 2015 — July 2019 • Sumgait, Azerbaijan

My engineering education has shaped my systematic thinking, analytical problem-solving and engineering mindset. These qualities are successfully applied to programming and provide a significant advantage in designing complex technical solutions.

PROFESSIONAL STRENGTHS

- Synthesis of engineering education and programming experience — both creative and systematic approach to technical issues.
- End-to-end project development — managing all stages from the idea phase to the implementation phase.
- Self-learning ability — mastering new technologies and frameworks in a short time.
- Trilingual communication skills (Azerbaijani, Turkish, English) — effective collaboration in an international environment.
- Attention to detail and adherence to the principle of quality code — minimizing technical debt.
