Born 1997

PROFILE

Software engineer with 15+ years of hands-on experience, writing code since 2010. I build the backend in Python and Node.js, and the frontend in React, React Native and Electron. I have worked across frontend, backend and automation — as a freelancer, in local companies, and remotely with a team abroad for six years. What I care about most is software that is easy to use, fast and reliable.

EXPERIENCE

2019 — 2025	**Gurbanov Software Company** — Poland	Python Developer · Remote
2017 — 2019	**Robotics Company**	Python Developer
